Question Report

c	Actual Start Time	# Question		
roe County Climate Action Plan Meeting - 12:00 p.m.	7/26/2023 11:0	0 52	2	
Question	Asker Name	Answer	Answer Name	Answer Email
Will I have access to the recording				
1 I have another appointment	Richard Codding	live answered	Madison Quinn	madisonquinn@monroecounty.gov
		Hi Rick, I can share the attendance list with you and the other CAP		
3 Mollwill we be able to see who's on? Am I on as apanalist? Rick Milne	Richard B Milne	committee members after the meeting!	Madison Quinn	madisonquinn@monroecounty.gov
Can you give me the web page to access the recording thank you.				
Richard Codding rcodding123 @gmail.com				
4 Thankyou	Richard Codding	We'll send out a follow up email to all attendees with the link!	Madison Quinn	madisonquinn@monroecounty.gov
		Please visit our webpage to submit an email through the contact		
6 Can you provide an address for email comments?	Linda Saalman	form: https://www.monroecountyclimateaction.com/contact	Madison Quinn	madisonquinn@monroecounty.gov
18 is this were we can pose questions?	Evan Lowenstein	Yes, please add questions to the Q&A feature.	Patrick Gooch	patrickgooch@monroecounty.gov
		The County's CATP (County-Wide Active Transportation Plan) does		
		have a discussion of inclement weather and the challenges to active		
		transportation that it may pose and some recommendations moving		
19 Love the proposed bike network. Does the data include seasonality?	Lystra McCoy	forward.	Patrick Gooch	patrickgooch@monroecounty.gov
		Yes, the County has connected with GLT about the Comprehensive		
21 Are you working with the Genesee Land Trust?	Madeline Schmitt	Plan, CATP, and will with the Climate Action Plan as well.	Patrick Gooch	patrickgooch@monroecounty.gov
Who have you spoken with as stakeholders? What qualifies as a				
7 stakeholder?	George Hebert	live answered	Madison Quinn	madisonquinn@monroecounty.gov
Does agriculture include the GHG from the production of synthetic				
9 nitrogen fertilizer which is derived from natural gas or coal?	Elizabeth Henderson	live answered	Madison Quinn	madisonquinn@monroecounty.gov
10 What is the process of collecting emissions data?	Sadie Ruth	live answered	Madison Quinn	madisonquinn@monroecounty.gov
13 i.e. how often is the data updated and verified	Sadie Ruth	live answered	Madison Quinn	madisonquinn@monroecounty.gov
The Climate Solutions Accelerator study showed very different GHG				
12 from agriculture!	Elizabeth Henderson	live answered	Madison Quinn	madisonquinn@monroecounty.gov
There is Det				
Thanks Pat.				
My question - will the transportation focus of the plan also address the				
WAYS people drive, as well as how far they drive (VMT)? I ask this				
because my observation is that the majority of drivers operate their				
vehicles in inefficient ways (speed, acceleration, low tires, etc.) that				
result in enormous drops in fuel efficiency and higher emissions. For				
example, driving at 75 mph is I believe a whopping 30% less fuel				
efficient than 55 mph. (I also notice that many people who drive fast				
22 also complain about the price of gas, but that's another discussion :)	Evan Lowenstein	live answered	Madison Quinn	madisonquinn@monroecounty.gov
double check gasoline more efficient than diesel, I beleive diesel is				
14 more efficient	David Cross	live answered	Madison Quinn	madisonquinn@monroecounty.gov

15 Is the VMT figure annual? And that includes all county residents?	Alex Turner	live answered	Madison Quinn	madisonquinn@monroecounty.gov
What mash a size and use while a build a manuful plan to some with				
What mechanism are you using to build a parallel plan to cope with	Linda Caalmaan	line encoded	Madiaan Osian	
	Linda Saalman	live answered	Madison Quinn	madisonquinn@monroecounty.gov
Will the County's plan provide guidance to actions that individual		live ensured	Madiaan Osian	
16 towns can take?	Bill Smith	live answered	Madison Quinn	madisonquinn@monroecounty.gov
Seeking clarity - All these goals of the county's climate action plan will				
24 serve as /non-binding/ policy recommendations for municipalities?	Robert Cook	live answered	Madison Quinn	madisonquinn@monroecounty.gov
What kind of tree that is used to model the tree planting numbers?				
36% of households rent (and can't plant trees) and most lot sizes don't				
25 support large trees.	Alex Turner	live answered	Madison Quinn	madisonquinn@monroecounty.gov
Has the county applied for				
Energy Efficiency and Conservation Block Grant				
Local governments can apply through January 31, 2024; however, all				
eligible entities that intend to apply must submit their Pre-Award				
Information Sheet by July 31, 2023. According to DOE, the application				
consists of only five yes or no questions, so it is not too late to start				
your application.		Yes, we are aware of this grant opportunity and are looking into		
		applying for it, along with a number of other opportunities at the		
39 I hope you're able to take advantage of this opportunity!	George Hebert		Clement Chung	clementchung@monroecounty.gov
27 How are GG emissions calculated for air travel?	Antonius Chess	live answered	Madison Quinn	madisonquinn@monroecounty.gov
Rain events of multiple inches in under 24 hours. Where will that be		The effects of climate change on our infrastructure systems will be		
36 addressed?	Ruhi Maker	analyzed in our forthcoming Climate Adaptation & Resiliency Plan	Clement Chung	clementchung@monroecounty.gov
can you explain more the opportunities for public input before the				
plan is finalized? not clear to me when or how public input will		line encoded	Madiaan Osian	
30 happen.	Piper Van Kerkhove		Madison Quinn	madisonquinn@monroecounty.gov
		Yes! We have been reaching out to school teachers and students as		
		part of our engagement, and we also have 3 student members on		
		our Climate Action Plan Advisory Committee, one is a high school		
37 Will the plan include working with schools at all?	Lola Gendrou		Clement Chung	clementchung@monroecounty.gov
		Just added to the chat!		
		https://survey123.arcgis.com/share/8ce48d7afc1840bfbd5fe0e5d27		
	Elizabeth Murphy		Patrick Gooch	patrickgooch@monroecounty.gov
48 What is the address for the survey?	George Hebert	https://arcg.is/1PmbeT	Molly Gaudioso	mgaudioso@bergmannpc.com
		Sue was appointed to the Committee as a citizen member, and when		
		she was elected to the Legislature, she was required to leave the		
I beleive Sue Hughes-Smith was origionally on the planning committee,		position. However, we are still very engaged with Sue, and her		
but she isn't anymore. She's a great climate advocate with a lot of		successor, Akilah Skerrette-Banister is also a board member for the		
29 knowledge. Why is she no longer on the committee?	Sadie Ruth		Clement Chung	clementchung@monroecounty.gov
		Please reach out to me at mgaudioso@bergmannpc.com - Happy to		
49 Can you answer my question about the partnership network?	Jonathan Cloud	connect!	Molly Gaudioso	mgaudioso@bergmannpc.com

PUBLIC WORKSHOP #2 JULY 26, 2023

Can you comment on what seems to be a small # of community 17 participants in your outreach efforts so far? Madeline S Are there currently any apartment complexes that have solar panels on their roofs and is that something worth considering and finding Xim Hudson 20 funding for them? Kim Hudson 1'm betting there might be grant funding for tree planting. If so, maybe that could be accessed and Monroe County could have a tree give Xim Hudson 23 away. Kim Hudson Kim Hudson 26 How do we get connected to the Partnership Network? Jonathan C Are there initiatives to have more towns become like Fairport that have "Fairport Electric"? Plans to expand the Solar farms? When will the bike network start construction? Are there plans to further expand the range of the power generated by 28 High Falls? Dennis Chri 31 Are you including potential climate refugees to the area? Victoria Zel How could the County (or City/Towns) incentivize property owners to NOT CUT down mature trees, which are powerful for carbon sequestration? Planting new sapling trees is decades away from achieving the carbon sequestration and property cooling capacity of Sally Howa 32 one MATURE tree? Sally Howa Sally Howa 33 my concern - your estimate for GHG from Ag is way too low. Elizabeth H any incentives get have commuters with electric bikes that aren't ready to give up use of cars? Bra	MaCau			
I may be jumping ahead, though was wondering if/how we would be able to apply for Green or sustaninability grants/funding or partnerships for our company? Asside from monitoring the emmissions, are any plans on the specifics to clean up the exhaust or other fumes of the RTS busses and the 11 landfills? Dennis Chri Can you comment on what seems to be a small # of community 17 participants in your outreach efforts so far? Madeline S Are there currently any apartment complexes that have solar panels on their roofs and is that something worth considering and finding 20 funding for them? Kim Hudson I'm betting there might be grant funding for tree planting. If so, maybe that could be accessed and Monroe County could have a tree give 3 away. Kim Hudson 26 How do we get connected to the Partnership Network? Jonathan C Are there initiatives to have more towns become like Fairport that have "Fairport Electric"? Plans to expand the Solar farms? When will the bike network start construction? Are there plans to further expand the range of the power generated by 28 High Falls? Dennis Chri 31 Are you including potential climate refugees to the area? Victoria Zel How could the County (or City/Towns) incentivize property owners to NOT CUT down mature trees, which are powerful for carbon sequestration? Planting new sapling trees is decades away from achieving the carbon sequestration and property cooling capacity of 32 one MATURE tree? Sally Howal The answer to my question about nitrogen fertilizer did not address 33 my concern - your estimate for GHG from Ag is way too low. Elizabeth H any incentives get have commuters with electric likes that aren't 34 ready to give up use of cars? Brandt Sm Are you looking at strategies for protecting prime agricultural land from suburban style low-density climate intensive development and the potential impact that would have on both reducing GHGs and potentially improving regional food security in the face of climate change as part of this plan, and identifying ways to make it financially				
able to apply for Green or sustaninability grants/funding or partnerships for our company?Asside from monitoring the emmissions, are any plans on the specifics to clean up the exhaust or other fumes of the RTS busses and the11landfills?Can you comment on what seems to be a small # of community17participants in your outreach efforts so far?Are there currently any apartment complexes that have solar panels on their roofs and is that something worth considering and finding 20 funding for them?20funding for them?23away.23away.26How do we get connected to the Partnership Network?27Jonathan C28High Falls?29Vhen will the bike network start construction? 35 feasible and attractive to farmers and municipalities?	beth Murphy			
	sa burkland			
35 feasible and attractive to farmers and municipalities? Elizabeth N Are there plans to address environmental racism and environmental	eth Murphy			

PUBLIC WORKSHOP #2 JULY 26, 2023

		5021	1 20, 2023
Some of the consequences of CLimate change are already with us.			
What is the County doing to deal with those consequences, working			
with others as needed, e.g. with the State around the Genesee River			
and possible dam failure that would affect greater Rochester and the			
41 County?	Madeline Schmitt		
In response to the question about solar panels on apartment buildings			
GreenSpark Solar has worked with local developers to install solar			
panels on multi-family buildings. Here's a short piece on why			
affordable housing and solar are a good match!			
https://greensparksolar.com/2023/05/11/why-are-affordable-housing			
and-solar-a-good-match/ and a recent example:			
https://greensparksolar.com/2022/09/27/270-on-east-offers-solar-			
42 powered-affordable-housing-to-rochester/	Brooke Mayer		
Great presentation!			
43 Thank you for the hard work and and thorough preparation on this!	John Botelho		
Will you be sharing attendees? So we can make sure that stakeholder			
44 groups have been represented in this process?	Kerry Ivers		
NY DEC passed a law requiring producers of substantial amounts of			
food waste to compost if there's a facility within 25 miles. Any idea if			
the county's new facility in Pittsford will meet these requirements?			
And does that facility *have* to be used for natural gas production,			
given the outsized contribution of natural gas to GHG emissions in the			
45 county?	Robert Cook		
Pittsford recently became recognized as a NYSERDA Climate Smart			
Community. Any idea if others in the County are following suit at			
46 maybe even a higher level of certification than Pittsford?	Jill Bellenger		
47 Thanks! :)	Elizabeth Murphy		
50 Thank you for the presentation	Richard B Milne		
51 Thanks!	Jonathan Cloud		
52 Many thanks! Nicely done.	Matthew O'Connor		

PUBLIC WORKSHOP #2 JULY 26, 2023
